

KiPROmini

Qualified Compact Flash (CF) Cards

There are a large number of CompactFlash (CF) cards available in the marketplace, however not all CF cards provide sufficient bandwidth for use with the AJA Ki Pro Mini. The following CF cards have been tested and are AJA qualified for use with the AJA Ki Pro Mini as of January 2014. Note that all testing was done on Ki Pro Mini firmware v4.2.

Qualified CF Cards

Vendor & Model	Vendor Website
SanDisk Extreme Pro CompactFlash 32GB	http://www.sandisk.com/products/memory-cards/compactflash/extremepro-160mbs/?capacity=32GB
SanDisk Extreme Pro CompactFlash 64GB	http://www.sandisk.com/products/memory-cards/compactflash/extremepro-160mbs/?capacity=64GB
SanDisk Extreme Pro CompactFlash 128GB	http://www.sandisk.com/products/memory-cards/compactflash/extremepro-160mbs/?capacity=128GB
SanDisk Extreme Pro CompactFlash 256GB	http://www.sandisk.com/products/memory-cards/compactflash/extremepro-160mbs/?capacity=256GB

Please make a careful note of the specific CF card versions listed above. CF card manufacturers may have more than one type of CF card offering in their product line.

Using non-qualified CompactFlash cards with the AJA Ki Pro Mini is strongly discouraged. Using non-qualified CompactFlash cards may result in dropped frame warnings, media mounting issues, or other problems.

Discontinued CF Cards

The following list of cards were previously certified, but have since been discontinued by their manufacturer. They are still viable for use with Ki Pro Mini, if available:

Vendor	Model
Delkin	CombatFlash 625x 32GB
Hoodman	UMDA RAW CompactFlash 32GB 675x
SanDisk	Extreme Pro CompactFlash 32GB
SanDisk	Extreme Pro CompactFlash 64GB

This list will change as new CompactFlash cards become available or are discontinued by the manufacturer. Be sure to visit the AJA Ki Pro Mini support web page for the latest AJA-qualified CompactFlash cards for use with Ki Pro Mini:
