AIR

60mm Balance travel

Quick release sliding camera plate

2 Selectable counterbalance positions

Integrated 75mm bowl with a bubble level

A die cast alloy bowl offers quick levelling, optimum torsional rigidity & long term durability

Fluid drag system

constant in all temperature ranges

Neoprene leg protection

Excellent grip while carrying or setting up the tripod in extreme weather climates

Three leg angle locks

Eliminate the need for a spreader, the 3-position leg angle locks take Solo down to a ground-hugging 23cm (9.2") to a rock solid operating height to 161cm (63") with absolute stability

Quick action

self adjusting Rapid Lock

Spike with wind down rubber feet

For all surfaces the Solo 75 tripod can be adapted to suit all terrains by winding up the rubber feet to reveal spikes

Weatherproof carry case

The padded softcase satisfies all transport needs

Accessory Mounting Block

Available in systems only

(3001) Air Tripod System Components
