## **Introduction**

Thank you for purchasing the MD-CROSS HDMI / (3G/HD/SD)-SDI Cross Converter.

The MD-CROSS is a truly portable converter, which incorporates our new easy to use LCD and button control system. This gives you easy access to all of the amazing features that have been unavailable without a computer until now. The days of having to play with complicated dip switches or having to carry around a computer to change a simple setting are gone.

The MD-CROSS features the following four modes:

1. HDMI to SDI while simultaneously converting SDI to HDMI
2. HDMI to HDMI while simultaneously converting SDI to SDI
3. HDMI to SDI and HDMI
4. SDI to SDI and HDMI

The MD-CROSS includes the same Down Up Cross Converter from our multi-award winning MD-DUCC, allowing either the HDMI or SDI input to be scaled and/or frame rate converted to the required standard.

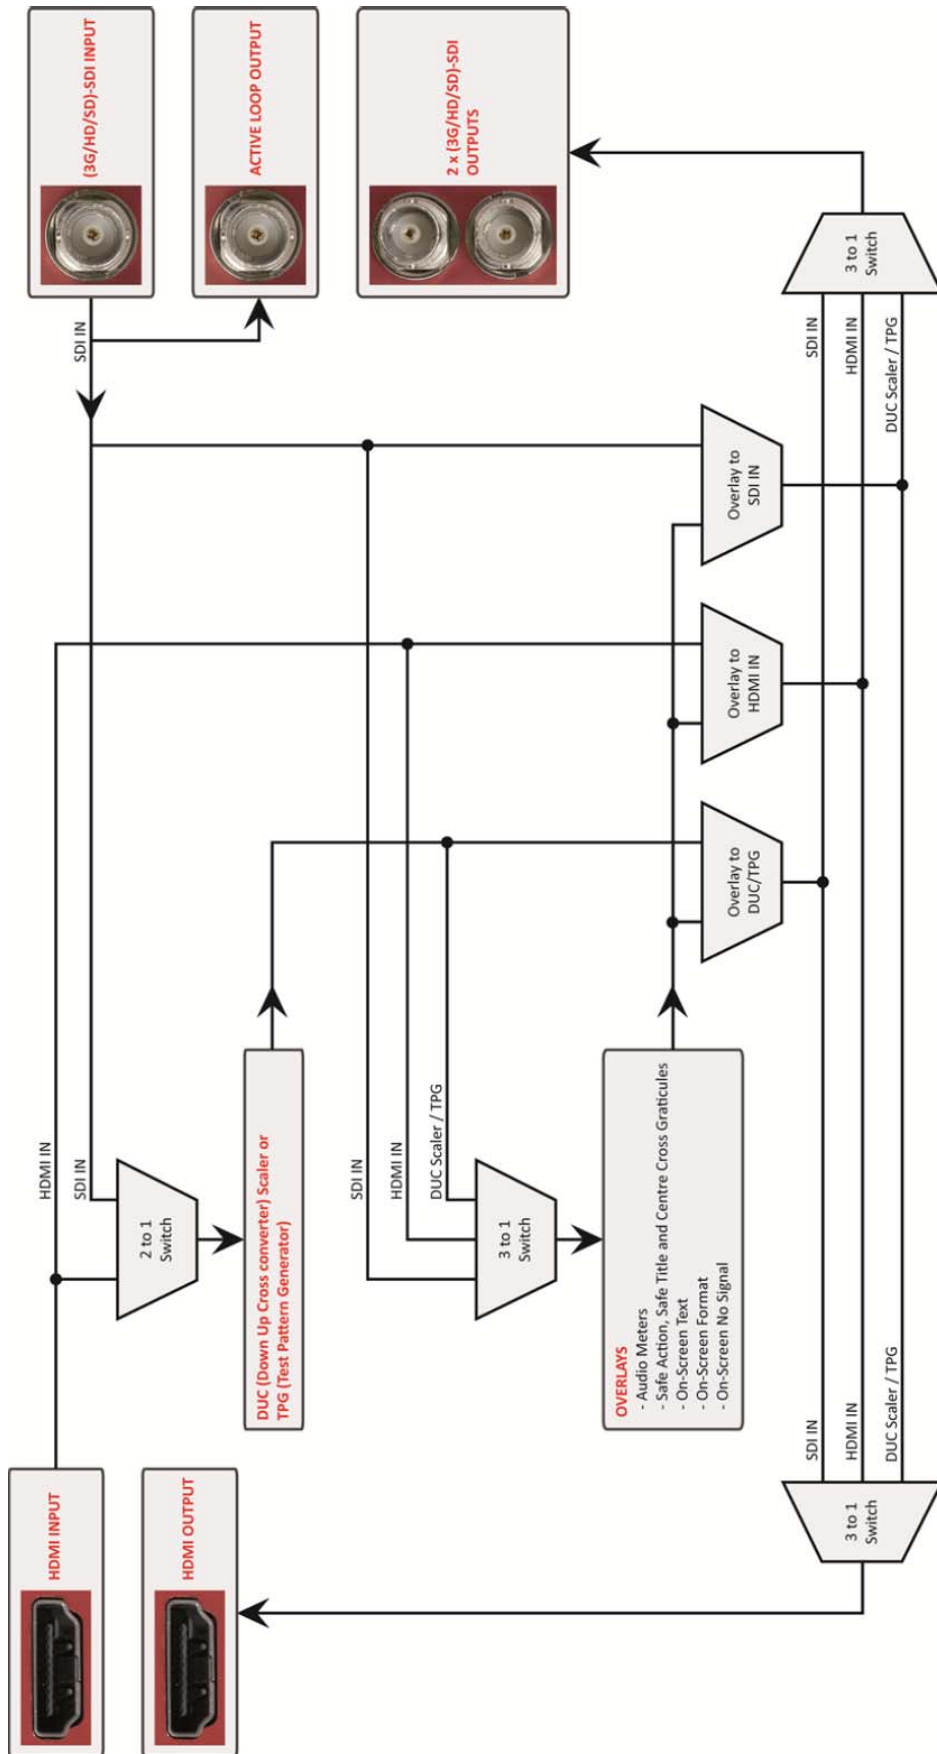

The MD-CROSS includes the Professional 3G/HD/SD Test Pattern Generator featuring:

- 26 Selectable Output Formats
- 54 Test Patterns including Luma and Chroma Zone-plates
- Audio Test Tone Generator

This unit also includes:

- (3G/HD/SD)-SDI Active Loop-Through Output
- Full 16-Channel Audio Metering Overlays
- Adjustable Safe Title and Safe Action Overlays and static Centre Cross
- Text Overlays
- USB port for control and firmware updates
- New Metal Thread Locking DC Power Socket
- Power Supply, HDMI Cable and USB Cable

## Flow Chart

## **Main Menu**

Upon power up the unit will start in the Main Menu pointing to Input Status.

The Main Menu are:

1. Input Status
2. Control
3. Scaling/TPG
4. Audio
5. Audio Meters
6. Graticules
7. Text Overlays
8. Setup

Press the < and > buttons to move left or right through the menus.

To enter into a menu press the ENTER button.

Notes:

- 1.) Defaults are highlighted in yellow.
- 2.) When an option is changed, a highlighted **S** will appear in the top right of the LCD screen and will disappear when the options are saved after 10 seconds. Avoid powering down the unit during this time.
- 3.) You can always return to the Main Menu by pressing the BACK button twice.
- 4.) As you move through the menus changing parameters, they will be instantly applied to the output signal.
- 5.) Scaler and DUC (Down Up Cross conversion) are used interchangeably in the MENUS.

## **SERVICE WARRANTY**

Decimator Design warrants that this product will be free from defects in materials and workmanship for a period of 12 months from the date of purchase. If this product proves to be defective within this warranty period, Decimator Design, at its discretion, will either repair the defective product without charge for parts and labour, or will provide a replacement product in exchange for the defective product.

In order to service under this warranty, you the Customer, must notify Decimator Design of the defect before the expiration of the warranty period and make suitable arrangements for the performance of service. The Customer shall be responsible for packaging and shipping the defective product to a designated service centre nominated by Decimator Design, with shipping charges prepaid. Decimator Design shall pay for the return of the product to the Customer if the shipment is to a location within the country in which the Decimator Design service centre is located. The Customer shall be responsible for paying all shipping charges, insurance, duties, taxes, and any other charges for products returned to any other location.

This warranty shall not apply to any defect, failure or damage caused by improper use or improper or inadequate maintenance and care. Decimator Design shall not be obligated to furnish service under this warranty a) to repair damage resulting from attempts by personnel other than Decimator Design representatives to install, repair or service the product, b) to repair damage resulting from improper use or connection to incompatible equipment, c) to repair any damage or malfunction caused by the use of non-Decimator Design parts or supplies, or d) to service a product that has been modified or integrated with other products when the effect of such a modification or integration increases the time of difficulty of servicing the product.
