

# Canon

# PowerShot G7X Mark II

## ILLUMINATE YOUR PASSION

Stay inspired with the PowerShot G7 X Mark II camera†, which combines exhilarating speed and performance with a smart, compact design. It can be ideal for travel, events and anywhere on the go, or as a secondary camera, and features a high-performance 1.0-inch 20.1 Megapixel\* CMOS sensor as well as a bright f/1.8–2.8 lens to help capture impressive images whenever your creativity sparks, even in low light conditions. The new DIGIC 7 Image Processor immediately pays dividends with improved auto focus tracking, enhanced IS and superb image clarity even when shooting with a high ISO. For increased flexibility, the PowerShot G7 X Mark II offers high-speed continuous shooting up to 8 fps in RAW\*\*, JPEG and RAW+JPEG\*\* modes, and is equipped with Full HD capability, built-in Wi-Fi® and NFC™ and in-camera RAW conversion, giving you everything you need to capture inspiring images and video and share them with ease.

# High Detail, High Speed 1.0" CMOS Sensor & DIGIC 7

The large 1.0-inch, 20.1 Megapixel\* CMOS sensor helps capture high-quality images and videos with a wide dynamic range, a high resolution for detailed prints

and more. The new DIGIC 7 Image Processor works with the CMOS sensor to help ensure each image has high amounts of sharpness, while keeping picture noise to a minimum. Dual Sensing IS provides improved IS performance with up to 4-stops of image stabilization, counteracting image blur caused by body movement.

Enhanced tracking capabilities also help keep focus on subjects throughout the action, while improved face tracking maintains its focus even

in low light. Combined, the CMOS sensor and DIGIC 7 Image Processor fuel a powerful camera that performs both brilliantly and rapidly.

## Optical Brilliance f/1.8-2.8 Lens

The remarkable lens on the PowerShot G7 X Mark II camera features a bright aperture value of f/1.8-2.8 with an Optical Zoom of 4.2x (24mm-100mm). It puts more in your frame and captures an incredible variety of situations with artistry and precision.

A 9-blade iris diaphragm creates beautiful bokeh.

## Full Control 1080p Full HD

Capture incredibly realistic 1080p Full HD video at 60 fps with stereo sound in MP4 format, which is convenient for sharing. Recording is easy with a versatile control ring that lets you change settings and keep noise to a minimum while focusing. This allows for quick and near-silent adjustments.

## 3.0" Capacitive Touch Panel LCD

The large, high-resolution, 3.0" LCD monitor tilts up 180° and down 45°, making it ideal for composing self portraits and taking photos at high and low angles with ease. Thanks to capacitive touch-panel operation, you can simply touch the screen to access quick control settings, focus and shutter release.

## In-camera RAW Conversion

The PowerShot G7 X Mark II camera puts complete creative control in your hands with its powerful in-camera RAW conversion, which lets you adjust multiple aspects of an image after you capture it, without using a computer.

## Up to 8 fps Continuous Shooting

Capture eye-opening action shots easily with high-speed continuous shooting up to 8.0 fps. Continuous shooting is available in RAW\*\*, JPEG and RAW+JPEG\*\* modes so you can preserve the moment you want, how you want.

## Built-in Wi-Fi® and NFC™ Technologies

Built-in wireless connectivity allows for on-the-go convenience when you want to share your photos and videos with friends and family and connect to compatible devices easily.
